Subject: GISWP Comments

Mr. Leo and Betsy,

I will be testifying at the hearing on the GISWP on Thursday. We have been working with our engineer, Rick Rollins, to develop either some numbers, or a methodology to develop some numbers, for technology based numeric effluent limits we would like to see included in the Permit. We intended to submit them with our written comments on 3 February.

Unfortunately, Rick's father died last week. He has gone back to Texas to deal with the funeral and other family matters, and he intends to be back in California by 5 February. He will continue to work on generating his report, but I feel that he should not have to work this week if his family needs him. Therefore we will strive to submit our complete comments on Thursday, but we request that if necessary, we be allowed to supplement our comment letter to include Rick's work and our proposed limits the following week, on or before 11 February. I hope this is acceptable to the Board and staff.

Thanks for your consideration of our request.

Daniel Cooper
